

Flexible compact design proves a winner

The recent installation of a William Kenyon vertical rodless tensioner on BM5 at the BillerudKorsnas mill in Gavle, Sweden, has again highlighted the unit's versatility when limited space might cause a problem.

Thanks to the tensioner's compact footprint, it was possible to position the unit in a very tight area. The flexible design also meant an offset mounting bracket could be utilised to maintain the correct alignment.

A spokesperson for the mill commented: "The tensioner is operating perfectly. The unit is compact yet extremely robust. The design has allowed us to utilise a small space with minimum disruption to our existing arrangements."

The mill in Gavle produces liquid packaging board and WTL. It has a production capacity of 700 ktonnes/year.

New rope sample box available

A new presentation box has been produced containing a selection of rope samples with details on the size options available.

An accompanying leaflet provides a simple overview of William Kenyon's complete range of rope threading equipment and carrier rope accessories. Three versions have been produced in English, French and German. If you would like a box please call the Sales Team on +44 (0)161 308 6030.

New sales administrator in Erstein

Laetitia Zetting has been appointed to the role of sales administrator at William Kenyon's European sales office in Erstein. The office, which is located in the Alsace region of France, provides technical and administrative support to primarily the French and German markets, but also further afield to a range of markets across mainland Europe.

Said Sales Manager Frank Scharsich: "We are very pleased to welcome Laetitia. She will provide invaluable support to our growing sales operation in the region."
